

Docket No. AUS920010034US1

ABSTRACT OF THE DISCLOSURE

METHOD AND APPARATUS FOR EARLY PRESENTATION OF EMPHASIZED REGIONS IN A WEB PAGE

5

A method, apparatus, and computer implemented instructions for audibly presenting a document in a data processing system. The document is parsed to identify a presence of a selected tag, wherein text is associated
10 with the selected tag. Responsive to an identification of the presence of the selected tag, the text is audibly presented prior to presenting other text within the document.
